

Partnership - The Bydgoszcz Board of Federation on Engineering Association NOT

The Bydgoszcz Board of Federation on Engineering Association NOT represents interests of its members - 3150 engineers and technicians.

It has at its disposal databases with regional resources of companies, with their technological potential, technical staff, and research library - technical information including full Polish Standards database. The Bydgoszcz Board of Federation on Engineering Association NOT organises specialised, professional trainings, particularly for the industry sector. It has a resource base with appropriate training equipment. The Bydgoszcz Board of Federation on Engineering Association NOT takes part in such project activities as:

- participation in study and research of the labour market needs in regard to the demand for the new professions,
- counselling and co-operation in the development of curricula for new professions relating to technological and local development,
- participation in the quality system development,
- development of the strategy of interregional mobility of experts, trainers, learners and employees,
- participation in management of the project, dissemination of results and networking development.
