

Partnership - L'Institute Nationale Polytechnique de Toulouse

L'Institute Nationale Polytechnique de Toulouse comprises 3 engineers schools.

One of them is Ecole Nationale Supérieure des Ingénieurs en Arts Chimiques et Technologiques (the National School of Engineering in Chemical and Technological Arts), called ENSIACET.

One of the Laboratories: Laboratoire de Génie Chimique (LGC) deals with Process and Systems Engineering and next one: Laboratoire de Chimie Agro-industrielle deals with Agro-industrial Engineering.

The INP takes part in such project activities as:

- development of curricula for economic animator relating to the technological and rural/local development,
- testing the curricula for animator of technological development and entrepreneurship,
- consultancy, advise and participation in the quality system development,
- analysis of the labour market, development of mobility programmes for trainers, learners and employees,
- participation in management of the project, dissemination activities and networking development.
